Date: 12/10/2017

Dear Captain  
Good Day,

Please be informed that recently one of the fleet container vessels was inspected by PSC officer under Riyadh MOU. During course of inspection, PSC officer raised a deficiency for:

-Direct discharge of untreated sewage in harbor water through open sewage overboard discharge valve and discharging hospital gray and black water without passing through sewage treatment plant through a opened 3 way overboard valve.

In order to avoid similar deficiencies raised on board, you are kindly requested to ensure that all direct overboard sewage valves are closed prior to entering ports and all the sewage is discharged through sewage treatment plant. In addition to that, pls also ensure that all other requirements of MARPOL is strictly complied with at all times.

You are requested to confirm receipt, discuss the contents in the next consolidated meeting on board & keep a copy in the file DA-11 .

Best Regards,

Ali Mohtasham
